

Application Developer

Docsy is a brand-new startup in stealth mode. Our vision is to build a digital AI that automatically manages all your documents and paperwork. At the core is our distributed learning technology leveraging cutting edge research in data science and neural networks.

This position is for those, who love to bridge the gap between artificial intelligence and the user's use-cases.

Responsibilities

- Develop highest quality software in collaboration with ML- and UI-Engineers
- Develop easy to use views in collaboration with the UI-design team
- Build upon the latest frameworks, SwiftUI, iOS15+, Mac catalyst
- Design highly scalable, testable code
- Discover and fix programming bugs

Qualifications

- Master's degree or equivalent experience in Computer Science or related field
- Development experience with higher level programming languages
- Experience with different database systems

We Offer

- Highly competitive compensation
- Stock option plan as one of the first employees to the company
- Unique work environment

Please submit your CV, as well as your grade transcripts and any recommendation-letter you might want to share to info@docsy.de.

docsy GmbH is an equal opportunity employer and welcomes applications from all qualified individuals regardless of ethnicity, sex, disability, religion/belief, sexual orientation or age.
